

Curriculum Vitæ

1 General information

Geoffroy Couteau

Born on 08/30/1991.

Nationality: French

URL for website: <http://geoffroycouteau.fr>

ORCID: 0000-0002-6645-0106

Education

- Doctor of Computer Science, École Normale Supérieure de Paris (PSL University), Nov. 30, 2017
- Master of Research in Computer Science (MPRI), Université de Paris, September 2014
- Engineering Degree, Télécom Paristech, September 2014

Current position

Researcher (Chargé de Recherche) at CNRS. Research director (Directeur de Recherche) at CNRS starting from October 1st, 2026.

IRIF, UMR 8243, CNRS & Université Paris Cité (since October 2019)

HDR defended on March 20, 2024

Postdoctoral position: Karlsruhe Institute of Technology (Karlsruhe, Germany), from October 2017 to September 2019. Financial support: ERC PREP-CRYPTO (PI: Dennis Hofheinz).

Research

Area: cryptography and neighboring areas such as security and complexity theory.

Publications: 77 publications in peer-reviewed international conferences and journals, including 41 in top conferences and journals (CRYPTO, EUROCRYPT, CCS, S&P, FOCS, Journal of Cryptology) and 24 in strong ('rank A') conferences (ASIACRYPT, TCC, ITCS, ToSC, RANDOM).

Invited Talks: Fourth Information-Theoretic Cryptography conference (ITC 2023).

Recent Contracts: Principal investigator of PCTC (Amazon Research Award, 2026, €60k), OBELISC (ERC Starting Grant, 2024 – 2029, €1.5M), SCENE (ANR JCJ, 2021 – 2024, €170k), and LICENCED (DIM RFSI, 2022 – 2023, €60k). Local coordinator & work package manager of SecureCompute (PEPR Cybersécurité, 2022 – 2028, €5M / €1M IRIF). Member of BARRACUDA (ANR PRC, 2021 – 2025), A2C (ANR JCJC, 2024 – 2027), ComDist (ANR PRC, 2026 – 2030), and SYMPL (ANR JCJC, 2027 – 2030).

Animation and responsibilities

- Team leader of the Algorithm and Complexity team at IRIF.
- Member of the scientific council of the UFR (2020–2025) and of the laboratory (since 2023). President of the IRIF & Environment commission (since 2022).
- **Program committees:** CRYPTO (2023, 2026), EUROCRYPT (2021, 2020, **area chair** of EUROCRYPT 2026), TCC (2019, 2024), PKC 2022, SCN 2022, CSF (2022, 2023), Communication in Cryptology 2024, IWSEC (2021, 2020), WAHC (2022, 2021, 2020, 2019). .
- Member of the **organizing committee of ICALP'22**, responsible for the conference budget.

Supervision, diffusion, and teaching

- Supervision of 8 PhDs (five defended), 13 postdocs (6 currently), 5 Master students, and 17 internships or extended visits (> 2 months) of PhD students and postdocs.
- Teaching on average 76 hours/year at Université Paris Cité, Télécom Paris, ENS Lyon, EIDD, ANSSI, and Sorbonne Université from 2019 to 2024, and around 20 hours/year in 2025–2026 (teaching load reduced due to a one-day-per-week involvement in consulting activities).
- Wrote a (single-author) book *An Introduction to Silent Secure Computation*¹ (Springer, 2026).

Full list of publications

In cryptography, conference publications are typically preferred over journals and are the primary means for disseminating new results. The most prestigious cryptography conferences are CRYPTO and EUROCRYPT, followed by ASIACRYPT and TCC, and the other conferences of the International Association for Cryptologic Research (ToSC, CHES, PKC). The most prestigious security conferences are CCS, S&P, NDSS, and Usenix, and the most prestigious theoretical computer science conferences are FOCS and STOC. The top cryptography journal, the Journal of Cryptology (whose level is on par with CRYPTO and EUROCRYPT), publishes extended versions of papers previously published at top IACR conferences or original papers.

Except for S&P, there is no notion of first author: authors are ranked alphabetically on the papers. Since 2015, my work has resulted in 77 publications, all at peer-reviewed international conferences or at the Journal of Cryptology (including 41 in top conferences and journals, and 24 in other ‘rank A’ conferences).

77. Firebolt: Fast, Lightweight, Malicious Non-Interactive Vector-OLE, *ASIACRYPT 2026*, Michael Adjedj, Geoffroy Couteau, and Nikolaos Makriyannis
76. A Note on the Security of ECDSA with Presignatures or Biased Nonces, *ASIACRYPT 2026*, Geoffroy Couteau and Nikolaos Makriyannis
75. From OT to OLE with Almost-Linear Communication, *TCC 2026*, Geoffroy Couteau and Naman Kumar
74. On Compressing Linearly Shared Correlations, *TCC 2026*, Geoffroy Couteau, Alexander Koch, Nikolas Melissaris, Peter Scholl, Sacha Servan-Schreiber, and Xiayi Ye
73. On Threshold Signatures from MPC-in-the-Head, *Communications in Cryptology 2026*, Eliana Carozza and Geoffroy Couteau
72. Succinct Two-Round Two-Party Signing from PCFs, *CRYPTO 2026*, Lennart Braun, Geoffroy Couteau, Kelsey Melissaris, Mahshid Riahinia, and Elahe Sadeghi
71. Post-Quantum Public-Key Pseudorandom Correlation Functions for OT, *CRYPTO 2026*, Kaartik Bhushan, Shweta Agrawal, Geoffroy Couteau, and Mahshid Riahinia
70. Two-Round 2PC ECDSA at the Cost of 1 OLE, *PKC 2026*, Michael Adjedj, Constantin Blokh, Geoffroy Couteau, Arik Galansky, Antoine Joux, and Nikolaos Makriyannis
69. Client-Server Homomorphic Secret Sharing in the CRS Model, *EUROCRYPT 2026*, Damiano Abram, Geoffroy Couteau, Lalita Devadas, Aditya Hegde, Abhishek Jain, Lawrence Roy, and Sacha Servan-Schreiber
68. Stateless 2PC Signatures for Internet-Scale Authentication and Authorization, *AsiaCCS 2026*, Michael Adjedj, Geoffroy Couteau, Arik Galansky, Nikolaos Makriyannis, and Oren Yomtov
67. Concretely-Efficient Multi-Key Homomorphic Secret Sharing and Applications, *IEEE S&P 2026*, Kaiwen He, Sacha Servan-Schreiber, Geoffroy Couteau, and Srinivas Devadas
66. Pseudorandom Correlation Functions for Garbled Circuits, *TCC 2025*, Geoffroy Couteau, Srinivas Devadas, Alexander Koch, and Sacha Servan-Schreiber

¹<https://link.springer.com/book/10.1007/978-3-032-07089-0>

65. Multiparty Homomorphic Secret Sharing and More from LPN and MQ, *TCC 2025*, Geoffroy Couteau, Naman Kumar, and Xiayi Ye
64. Fast Pseudorandom Correlation Functions from Sparse LPN, *ASIACRYPT 2025*, Lennart Braun, Geoffroy Couteau, Kelsey Melissaris, Mahshid Riahinia, and Elahe Sadeghi
63. SoK: On Shallow Weak PRFs, *IACR Transactions on Symmetric Cryptology (ToSC) 2025*, Christina Boura, Geoffroy Couteau, Léo Perrin, and Yann Rotella
62. Instantiating the Hash-Then-Evaluate Paradigm: Strengthening PRFs, PCFs, and OPRFs, *Cryptography and Communications 2025*, Chris Brzuska, Geoffroy Couteau, Christoph Egger, and Pierre Meyer
61. Structured-Seed Local Pseudorandom Generators and their Applications, *RANDOM 2025*, Benny Applebaum, Dung Bui, Geoffroy Couteau, and Nikolas Melissaris
60. Downlink (T)FHE Ciphertexts Compression, *SAC 2025*, Antonina Bondarchuk, Olive Chakraborty, Geoffroy Couteau, and Renaud Sirdey
59. $\omega(1/\lambda)$ -Rate Boolean Garbling Scheme from Generic Groups, *CRYPTO 2025*, Geoffroy Couteau, Carmit Hazay, Aditya Hegde, and Naman Kumar
58. Multi-Key Homomorphic Secret Sharing, *EUROCRYPT 2025*, Geoffroy Couteau, Lalita Devadas, Aditya Hegde, Abhishek Jain, and Sacha Servan-Schreiber
57. Breaking the $1/\lambda$ -Rate Barrier for Arithmetic Garbling, *EUROCRYPT 2025*, Geoffroy Couteau, Carmit Hazay, Aditya Hegde, and Naman Kumar
56. Enhanced Trapdoor Hashing from DDH and DCR, *EUROCRYPT 2025*, Geoffroy Couteau, Aditya Hegde, and Sihang Pu
55. An Efficient ZK Compiler from SIMD Circuits to General Circuits, *Journal of Cryptology 2025*, Dung Bui, Haotian Chu, Geoffroy Couteau, Xiao Wang, Chenkai Weng, Kang Yang, and Yu Yu
54. On Building Fine-Grained One-Way Functions from Strong Average-Case Hardness, *Journal of Cryptology 2025*, Chris Brzuska and Geoffroy Couteau
53. On Bounded Storage Key Agreement and One-Way Functions, *TCC 2024*, Chris Brzuska, Christoph Egger, Geoffroy Couteau, and Willy Quach
52. Depth-Reduction Algorithms for Directed Acyclic Graphs and Applications to Secure Multiparty Computation, *TCC 2024*, Pierre Charbit, Geoffroy Couteau, Pierre Meyer, and Reza Naserasr
51. FOLEAGE: F4-OLE-Based Multi-Party Computation for Boolean Circuits, *ASIACRYPT 2024*, Maxime Bombar, Dung Bui, Geoffroy Couteau, Alain Couvreur, Clément Ducros, and Sacha Servan-Schreiber
50. Lightweight Oblivious Transfer with a Public-Key Setup, *ASIACRYPT 2024*, Geoffroy Couteau, Lalita Devadas, Srinivasan Devadas, Alexander Koch, and Sacha Servan-Schreiber
49. Faster Signatures from MPC-in-the-Head, *ASIACRYPT 2024*, Dung Bui, Eliana Carozza, Geoffroy Couteau, Dahmun Goudarzi, and Antoine Joux
48. Instantiating the Hash-Then-Evaluate Paradigm: Strengthening PRFs, PCFs, and OPRFs, *SCN 2024*, Chris Brzuska, Geoffroy Couteau, Christoph Egger, and Pierre Meyer
47. Fine-Grained Non-Interactive Key Exchange, Revisited, *CRYPTO 2024*, Balthazar Bauer, Geoffroy Couteau, and Elahe Sadeghi
46. 10-Party Sublinear Secure Computation from Standard Assumptions, *CRYPTO 2024*, Geoffroy Couteau and Naman Kumar
45. Fast Public-Key Silent OT and More from Constrained Naor-Reingold, *EUROCRYPT 2024*, Dung Bui, Geoffroy Couteau, Pierre Meyer, Alain Passelègue, Mahshid Riahinia

44. A Note on Non-Interactive Zero-Knowledge from CDH, *CRYPTO 2023*, Geoffroy Couteau, Abhishek Jain, Zhengzhong Jin, and Willy Quach
43. Correlated Pseudorandomness from the Hardness of Quasi-Abelian Decoding, *CRYPTO 2023*, Maxime Bombar, Geoffroy Couteau, Alain Couvreur, and Clément Ducros
42. Constrained Pseudorandom Functions from Homomorphic Secret Sharing, *EUROCRYPT 2023*, Geoffroy Couteau, Pierre Meyer, Alain Passelègue, and Mahshid Riahinia
41. Sublinear-Communication Secure Multiparty Computation does not require FHE, *EUROCRYPT 2023*, Elette Boyle, Geoffroy Couteau, and Pierre Meyer
40. Short Signatures from Regular Syndrome Decoding in the Head, *EUROCRYPT 2023*, Eliana Carozza, Geoffroy Couteau, and Antoine Joux
39. Fine-Grained Non-Interactive Key-Exchange: Constructions and Lower Bounds, *EUROCRYPT 2023*, Abtin Afshar, Geoffroy Couteau, Mohammad Mahmoodi, and Elahe Sadeghi
38. Oblivious Transfer with Constant Computational Overhead, *EUROCRYPT 2023*, Elette Boyle, Geoffroy Couteau, Niv Gilboa, Yuval Ishai, Lisa Kohl, Nicolas Resch, and Peter Scholl
37. Improved Private Set Intersection for Sets with Small Entries, *PKC 2023*, Geoffroy Couteau and Dung Bui
36. Pseudorandom Correlation Functions from Variable-Density LPN, Revisited, *PKC 2023*, Geoffroy Couteau and Clément Ducros
35. Sublinear Secure Computation from New Assumptions, *TCC 2022*, Elette Boyle, Geoffroy Couteau, and Pierre Meyer
34. Anonymous Whistleblowing over Authenticated Channels, *TCC 2022*, Thomas Agrikola, Geoffroy Couteau, and Sven Maier
33. Random Sources in Private Computation, *ASIACRYPT 2022*, Geoffroy Couteau and Adi Rosén
32. Non-Interactive Secure Computation of Inner-Product from LPN and LWE, *ASIACRYPT 2022*, Geoffroy Couteau and Maryam Zarezadeh
31. Sharp: Short Relaxed Range Proofs, *CCS 2022*, Geoffroy Couteau, Dahmun Goudarzi, Michael Klooß, and Michael Reichle
30. Correlated Pseudorandomness from Expand-Accumulate Codes, *CRYPTO 2022*, Elette Boyle, Geoffroy Couteau, Niv Gilboa, Yuval Ishai, Lisa Kohl, Nicolas Resch, and Peter Scholl
29. On Building Fine-Grained One-Way Functions from Strong Average-Case Hardness, *EUROCRYPT 2022*, Chris Brzuska and Geoffroy Couteau
28. Statistical ZAPs from Group-Based Assumptions, *TCC 2021*, Geoffroy Couteau, Shuichi Katsumata, Elahe Sadeghi, and Bogdan Ursu
27. On Derandomizing Yao’s Weak-to-Strong OWF Construction, *TCC 2021*, Chris Brzuska, Geoffroy Couteau, Pihla Karanko, and Felix Rohrbach
26. Efficient NIZKs for Algebraic Sets, *ASIACRYPT 2021*, Geoffroy Couteau, Helger Lipmaa, Roberto Parisella, and Arne Tobias Ødegaard
25. Low-Complexity Weak Pseudorandom Functions in $AC_0[\text{MOD}2]$, *CRYPTO 2021*, Elette Boyle, Geoffroy Couteau, Niv Gilboa, Yuval Ishai, Lisa Kohl, and Peter Scholl
24. Silver: Silent VOLE and Oblivious Transfer from Hardness of Decoding Structured LDPC Codes, *CRYPTO 2021*, Geoffroy Couteau, Srinivasan Raghuraman, and Peter Rindal
23. Partially-Fair Computation from Timed-Release Encryption and Oblivious Transfer, *ACISP 2021*, Geoffroy Couteau, Bill Roscoe, and Peter Ryan

22. Breaking the Circuit Size Barrier for Secure Computation under Quasi-Polynomial LPN, *EUROCRYPT 2021*, Geoffroy Couteau and Pierre Meyer
21. Efficient Range Proofs with Transparent Setup from Bounded Integer Commitments, *EUROCRYPT 2021*, Geoffroy Couteau, Michael Klooß, Huang Lin, and Michael Reichle
20. Black-Box Uselessness: Composing Separations in Cryptography, *ITCS 2021*, Geoffroy Couteau, Pooya Farshim, and Mohammad Mahmoody
19. On Pseudorandom Encodings, *TCC 2020*, Thomas Agrikola, Geoffroy Couteau, Yuval Ishai, Stanislaw Jarecki, Amit Sahai
18. Pseudorandom Correlation Functions from Variable-Density LPN, *FOCS 2020*, Elette Boyle, Geoffroy Couteau, Niv Gilboa, Yuval Ishai, Lisa Kohl, Peter Scholl
17. Shorter Non-Interactive Zero-Knowledge Arguments and ZAPs for Algebraic Languages, *CRYPTO 2020*, Geoffroy Couteau, Dominik Hartmann
16. Efficient Pseudorandom Correlation Generators from Ring-LPN, *CRYPTO 2020*, Elette Boyle, Geoffroy Couteau, Niv Gilboa, Yuval Ishai, Lisa Kohl, Peter Scholl
15. Non-Interactive Zero-Knowledge in Pairing-Free Groups from Weaker Assumptions, *EUROCRYPT 2020*, Geoffroy Couteau, Shuichi Katsumata, and Bogdan Ursu
14. The Usefulness of Sparsifiable Inputs: How to Avoid Subexponential iO *PKC 2020*, Thomas Agrikola, Geoffroy Couteau, and Dennis Hofheinz
13. 2019 Efficient Two-Round OT Extension and Silent Non-Interactive Secure Computation, *CCS 2019*, Elette Boyle, Geoffroy Couteau, Niv Gilboa, Yuval Ishai, Lisa Kohl, Peter Rindal, Peter Scholl
12. Efficient Pseudorandom Correlation Generators: Silent OT Extension and More, *CRYPTO 2019*, Elette Boyle, Geoffroy Couteau, Niv Gilboa, Yuval Ishai, Lisa Kohl, Peter Scholl
11. A Note on the Communication Complexity of Multiparty Computation in the Correlated Randomness Model, *EUROCRYPT 2019*, Geoffroy Couteau
10. Designated-Verifier Pseudorandom Generators, and their Applications *EUROCRYPT 2019*, Geoffroy Couteau and Dennis Hofheinz
9. Non-Interactive Keyed-Verification Anonymous Credentials *PKC 2019*, Geoffroy Couteau and Michael Reichle
8. On the Concrete Security of Goldreich’s Pseudorandom Generator, *ASIACRYPT 2018*, Geoffroy Couteau, Aurélien Dupin, Pierrick Méaux, Melissa Rossi, and Yann Rotella
7. Compressing Vector-OLE, *CCS 2018*, Elette Boyle, Geoffroy Couteau, Niv Gilboa, and Yuval Ishai
6. New Protocols for Secure Equality Test and Comparison, *ACNS 2018*, Geoffroy Couteau
5. Efficient Designated-Verifier Non-Interactive Zero-Knowledge Proofs of Knowledge *EUROCRYPT 2018*, Pyrros Chaidos, and Geoffroy Couteau
4. Homomorphic Secret Sharing: Optimizations and Applications, *CCS 2017*, Elette Boyle, Geoffroy Couteau, Niv Gilboa, Yuval Ishai, and Michele Orrù
3. Removing the Strong RSA Assumption from Arguments over the Integers, *EUROCRYPT 2017*, Geoffroy Couteau, Thomas Peters, and David Pointcheval
2. Encryption Switching Protocols, *CRYPTO 2016*, Geoffroy Couteau, Thomas Peters, and David Pointcheval
1. Implicit Zero-Knowledge Arguments and Applications to the Malicious Setting, *CRYPTO 2015*, Fabrice Benhamouda, Geoffroy Couteau, David Pointcheval, and Hoeteck Wee

2 Scientific visibility

2.1 Prestigious contracts

In September 2023, I was awarded an ERC Starting Grant for my project OBELISC. The website of the project, which keeps track of my progress on the project's axis, the team members, and the associated publications, is available at <https://geoffroycouteau.github.io/obelisc>. Previously, I had been awarded an ANR JCJC (project SCENE) and a DIM RFSI (project LICENCED). I am also a coordinator of a PEPR Cybersécurité (SecureCompute).

2.2 Scientific distinctions

Awards for papers:

- My paper *On Building Fine-Grained One-Way Functions from Strong Average-Case Hardness*, co-authored with Chris Brzuska and presented at EUROCRYPT 2022, was invited to the Journal of Cryptology (an honor typically reserved for the top 3 accepted papers).
- My paper *Instantiating the Hash-Then-Evaluate Paradigm: Strengthening PRFs, PCFs, and OPRFs*, co-authored with Chris Brzuska, Christoph Egger, and Pierre Meyer and presented at SCN 2024, was invited to a special issue of the journal Communications in Cryptology (an honor reserved to a small selection of the best accepted papers).

Prizes: In May 2026, I was awarded an Amazon Research Award for my project PCTC². I received an honorary mention for my PhD from the GDR computer security PhD prize³.

Invited speaker at international conferences: I was an invited Spotlight Speaker at the fourth Information-Theoretic Cryptography Conference ITC 2023, a relatively young conference founded and supported by some of the leading researchers in cryptography. See the steering committee of ITC 2023⁴ and the program⁵.

Invited speaker at other events: In December 2025, I have been invited by Xavier Leroy to give a seminar at the Collège de France, as part of his course on secure computation⁶. Since 2018, I also have been an invited speaker at six international workshops.

- The 2018 workshop on the Theory and Practice of Secure Multiparty Computation (TPMPC).
- The 2019, 2021, 2023, and 2024 French-Israeli Workshop on the Foundations of Computer Science (the 2021 edition was eventually cancelled due to Covid).
- The 2019 Bertinoro workshop on Lower Bounds in Cryptography (BICI International Center for Informatics at Bertinoro, Italy), organized by Pooya Farshim, Iftach Haitner, Yuval Ishai, and Mohammad Mahmoody.
- In addition to the above, I was also an invited speaker at the journées nationales du GDR-IM (JNIM 2023), where I was representing the GT Codage & Cryptography (GT-C2).

In the past few years, I have committed to significantly reduce my travels by plane, to mitigate the impact of my research on global warming. Since 2021, I avoid whenever possible to use planes as a means of transportation. Because of that, I also had to decline several invitations to prestigious workshops: the 2022 Bertinoro workshop on Diffie-Hellman and pairing-based cryptography (organized by Hoeteck Wee and Eike Kiltz), the 2023 workshop of the Simons Institute for the Theory of Computing, on Minimal Complexity Assumptions for Cryptography (organized by Rafael Pass, Yuval Ishai, and Yael Kalai), the 2025 TPMPC workshop (organized by Arpitra Patra), and the 2025 semester on cryptography of the Simons Institute for the Theory of computing (organized by Dan Boneh, Elette Boyle, Shafi Goldwasser, Yuval Ishai, and Daniel Wichs).

2.3 Committees, editorial boards, reviewing, juries

Membership in thesis committees

Internationally:

- Sebastian Hasler, University of Stuttgart (Stuttgart, Germany), Low-Communication Preprocessing for Secure Multiparty Computation – Reviewer & Examiner, July 2026
- Stella Wahnig, CISA (Saarbrücken, Germany), Aces of Authenticity – Reviewer & Examiner, February 2026
- Sacha Servan-Schreiber, MIT (Boston, USA), New Tools for On-the-Fly Secure Computation – Examiner, December 2024
- Lennart Braun, Aarhus University (Aarhus, Denmark), Cryptography after Prime Time – Reviewer & Examiner, September 2024
- Sihang Pu, CISA Helmholtz Center for information security (Saarbrücken, Germany), Towards Compact Bandwidth and Efficient Privacy-Preserving Computation – Reviewer & Examiner, October 2023
- Javier Silva, UPF (Barcelona, Spain), Zero-knowledge proofs and isogeny-based cryptosystems – Examiner, March 2021

In France:

- Duy Nguyen – Reviewer & Examiner, September 2026
- Hugo Delavenne – Reviewer & Examiner, August 2026
- Marc Damie, Université de Lille, Calculs respectueux de la vie privée sur données éparses – Reviewer & Examiner, December 2025
- Axel Durbet, Université Clermont Auvergne, Une approche cryptographique des systèmes d’authentification biométrique respectant la vie privée – Reviewer & Examiner, November 2024
- Jules Maire, Sorbonne Université, Zero-Knowledge Arguments from Secure Multiparty Computation – Examiner, October 2024
- Clara Pernot, INRIA Paris, New Tools for On-the-Fly Secure Computation – Examiner, February 2024
- Thibault Feneuil, Sorbonne University, Post-Quantum Signatures from Secure Multiparty Computation – Examiner, October 2023

Program committees and editorial boards

2026:

- **Area chair of EUROCRYPT 2026** – 45th Annual International Conference on the Theory and Applications of Cryptographic Techniques, May, 2026, Rome, Italy
- **CRYPTO 2026** – 46th International Cryptology Conference, August 17-20, 2026, Santa Barbara, USA

2024:

- Editorial board of the IACR journal **Communications in Cryptology**
- **TCC 2024** – Theory of Cryptography Conference, December 2-6 2024, Milan, Italy

2023:

- **CSF 2023** – 36th IEEE Computer Security Foundations Symposium, July 9-13, 2023 - Dubrovnik, Croatia
- **CRYPTO 2023** – 43rd International Cryptology Conference, August 19-24, 2023, Santa Barbara, USA

2022:

- **PKC 2022** – International Conference on Practice and Theory of Public-Key Cryptography, March 8-11, 2022, online
- **CSF 2022** – 35th IEEE Computer Security Foundations Symposium August 7 - 10, 2022, Haifa, Israel
- **SCN 2022** – International Conference on Security and Cryptography for Networks, September 12-14, 2022, Amalfi, Italy
- **TCC 2022** – Theory of Cryptography Conference, November 7-10, 2022, Chicago, USA
- **WAHC 2022** – 10th Workshop on Encrypted Computing & Applied Homomorphic Cryptography, November 7, 2022, Los Angeles, CA, USA

2021:

- **EUROCRYPT 2021** – 40th Annual International Conference on the Theory and Applications of Cryptographic Techniques, October 17-21, 2021, Zagreb, Croatia
- **IWSEC 2021** – 16th International Workshop on Security, September 8-10, 2021, online
- **WAHC 2021** – 9th Workshop on Encrypted Computing & Applied Homomorphic Cryptography, November 15, 2021, Seoul, South Korea

2020:

- **EUROCRYPT 2020** – 39th Annual International Conference on the Theory and Applications of Cryptographic Techniques, May 11-15, 2020, online
- **IWSEC 2020** – 15th International Workshop on Security, September 2-4, 2020, online
- **WAHC 2020** – 8th Workshop on Encrypted Computing & Applied Homomorphic Cryptography, December 15, 2020, online

2019:

- **TCC 2019** – Theory of Cryptography Conference, December 1-5 2019, Nuremberg, Germany
- **WAHC 2019** – 7th Workshop on Encrypted Computing & Applied Homomorphic Cryptography, November 11, 2019, London, UK

Reviewer for international funding agencies

- German National Research Center for Applied Cybersecurity (ATHENE), 2023 and 2025
- Independent Research Fund Denmark (DFF), 2022
- Israel Science Foundation (ISF), 2022 and 2023
- Agence nationale de la recherche (ANR), 2024

Reviewing activities for conferences

Beyond my involvement in program committees, I am regularly involved in reviewing papers for conferences. I reviewed one or several papers for each of the conferences below:

ASIACRYPT 2026; TCC 2026; PKC 2026; EUROCRYPT 2025; EUROCRYPT 2024; TCC 2023; TCHES 2022; CRYPTO 2022; EUROCRYPT 2022; TCC 2021; ASIACRYPT 2021; CRYPTO 2021; PKC 2021; STOC 2021; ASIACRYPT 2020; TCC 2020; FOCS 2020; CRYPTO 2020; ITCS 2020; SAC 2019; CRYPTO 2019; PKC 2019; TCC 2018; CCS 2018; CRYPTO 2018; EUROCRYPT 2018; PKC 2018; ASIACRYPT 2017; TCC 2017; ICALP 2017; ACNS 2017; PKC 2017; CT-RSA 2017; CRYPTO 2016; PKC 2016; CT-RSA 2015; EUROCRYPT 2015.

Reviewing activities for journals

TOPS (2025); Computer Journal (2023); Design, Codes, and Cryptography (2022); IEICE (2021); Discrete Mathematics (2021); Journal of Cryptology (2020, 2022, 2023); ACM Transactions on Computation Theory (2020); Transactions on Dependable and Secure Computing (2020); SN Applied Science (2020); Transactions on Information Forensics & Security (2019, 2020, 2024, 2025); Theoretical Computer Science (2019); Design, Codes, and Cryptography (2018).
